

# ***PULLMAN-HOLT***

## **Stone Care Floor Machine**

Designed for the professional in stone or masonry floor care, this heavy-weighted floor machines provides the friction required to perform many types of stone maintenance and refinishing operations, including marble crystallization. A motor canopy bracket allows the operator to add up to ten 9 pound discs directly above the center of the motor for increased friction without compromising balance. Equipped with special pad driver.

### Features:

- Powder coated aluminum chassis is chip-resistant and corrosion resistant.
- Star latch allows operator to adjust handle to any comfortable height, using hand or foot.
- Dual deadman switch system stops motor with release of trigger for operator protection.
- Safety latch disables machine when not in use.
- Extra heavy-duty axle and wide wheels provides easier transport.
- Continuous water feed hook-up with valve conveniently located on handle.
- Non-marring bumpers on chassis and motor canopy.
- 150 lbs. net weight for the machine (up to 240 lbs. with optional canopy weights).
- 50 foot power cord.

**Lead "Donut" Weight Under Chassis (50lbs)**

**Water Control Valve with Hose Fitting**

### Optional Canopy Weights (9 lbs.)

**Maximum storage 10 extra weights (90 lbs)**

**Extra Heavy Duty Handle, Axle, and Wheels Assembly**
